

Be my guest

Step into a quiet retreat

orangebox

Product Description

Form and function have been carefully distilled into a phonebooth that meets all the needs of the modern-day workplace — a quiet retreat to focus and talk in private.

Be my guest® phonebooth helps maximise productivity, frees up meeting room space, is quick and simple to assemble and easy to move around.

As our most competitively priced phonebooth to date, Be my guest® still showcases the exceptional quality and attention to detail that Orangebox is known for.

By balancing carefully considered design and acoustics with ease of assembly and cost — form and function have been distilled to Be my guest's essence — resulting in optimal performance.

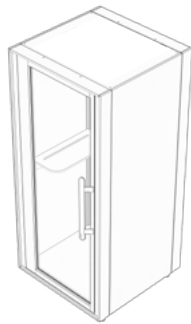

As a continuation of the phonebooth's elegant simplicity, **Be my guest® – Connecting spaces** is designed to create a variety of informal and diverse workspaces within the workplace, giving users the freedom to choose their most comfortable mode of working.

By addressing the balance between working collaboratively and working privately, the flexible, scalable and functional system intuitively meet users' needs by facilitating team collaboration, individual privacy or anything in between.
