

Home office

HomeFit[©]

HomeFit®

An ergonomic sit/stand desk stored in a small cabinet.

We all work more and more from home. If you have the luxury of a separate (work) room, you'll probably choose an adjustable desk and a good office chair. However, not everyone has the space for such a home office. That is why we have HomeFit®!

With a width of only 105 cm and a depth of 30 cm, HomeFit® is no bigger than a shoe cabinet or a large suitcase. The unique design and many colour options will guarantee that HomeFit® blends seamlessly into any living room.

Compact

The unique design and many colour options will guarantee that HomeFit® blends seamlessly into any living room.

Transformation

From cabinet to workplace

The transformation from an anonymous cabinet into a fully functional workstation can be done quickly and easily by opening the doors and folding up the worktop. The worktop also contains the controls for height adjustment.

The handy storage tray in the cabinet provides space for work related materials such as a laptop, mouse, binder or work folder.

Huiselijk

Home meets office;
a trend that will
continue in the
coming years.

HomeFit®

Attention to detail

The transformation from an anonymous cabinet into a fully functional workstation can be done quickly and easily by opening the doors and folding up the worktop. The worktop also contains the controls for height adjustment. The handy storage tray in the cabinet provides space for work related materials such as a laptop, mouse, binder or work folder.

HomeFit®

Is made in-house, in our own
factories in the Netherlands

After removing the cardboard box, all you have to do
is plug it in and your new desk is ready for use.

Creating possibilities

People want to enjoy work. And in a healthy way. In creative and innovative work environments, where sustainability is important.

We get it. Ever since 1951. Every day we work on the ideals of tomorrow. Simply in our factories in Emmen and Hoogeveen.
